

ST. ANTHONY'S GUILD SELECTS FOTWARE FROM SCS FOR DIGITAL ASSET MANAGEMENT

St. Anthony's Guild, a New York-based non-profit corporation, has selected the Team package of Fotoware's SaaS for their digital media management needs.

Although the installation process is still in the early stages, St. Anthony's Guild is excited about the process. Prior to the purchase of Fotoware, the Guild had been using Google Drive to store their digital media. They are looking forward to the storage management and retrieval capabilities that a unified DAM system will provide.

Paul Burke, Director of Technology and Training at St. Anthony's Guild, believes that staff efficiency will be significantly improved by the adoption of Fotoware. He is one of four people who will initially be using the software, although he believes that this number is likely to grow in the near future.

The transition to Fotoware is on track to be completed within the next month. Marty MacDonald, Editorial Applications Manager at SCS, has been helping out where possible. As Paul puts it, "Marty has been wonderful!"

About The Shed:

The mission of St. Anthony's Guild is to promote devotion to St. Anthony and to enhance the spiritual well-being of our members, living and deceased. The Guild supports the education of young men studying to become Franciscan Friars, the care for elderly Franciscan Friars who have served so many for so long, and to the work of the Franciscan Friars with the poor and marginalized. About Fotoware:

Fotoware is a Norwegian software company which, in the space of 20 years, has become a world-leading provider of Digital Asset Management (DAM) solutions. Fotoware was founded in 1997 by Ole Christian Frenning (former press photographer and photo editor of Aftenposten) and Anders Bergman (former leader of development at Hasselblad Electronic Imaging) and was one of the first in the world to offer a DAM system. You can learn more at www.fotoware.com.
